Systems Modeling and Simulation Community (*SMS Community*)

December 08, 2020

Systems Modeling and Simulation:*

The use of interdisciplinary functional, architectural, and behavioral models (with physical, mathematical, and logical representations) in performing MBSE to specify, conceptualize, design, analyze, verify and validate an organized set of components, subsystems, systems, and processes.

*SMSWG – Terms & Definitions: https://www.nafems.org/about/technical-working-groups/systems_modeling/smstermsdefinitions/s-u/

Agenda

- Frank Popielas: **Opening of meeting**
- **Presentation and Open Discussion: MIC (Model Identity Card) – Eric Landel**
- **Upcoming meetings**
- **Q&A**

Upcoming Meetings

- January 2021: IW 2021

Q & A

- Open discussion
